

Description

The Mastladder is a vertical Securail 2016 equipped with fixed rungs, crimped into the mast. Usable with the Granvia 4 guided fall arrester, the user can move freely and safely upwards or downwards. This ladder type is particularly well suited for applications where a discreet solution is required, antennas, electrical towers or wind turbines.

Material

Anodized aluminium EN AW 6060 T66

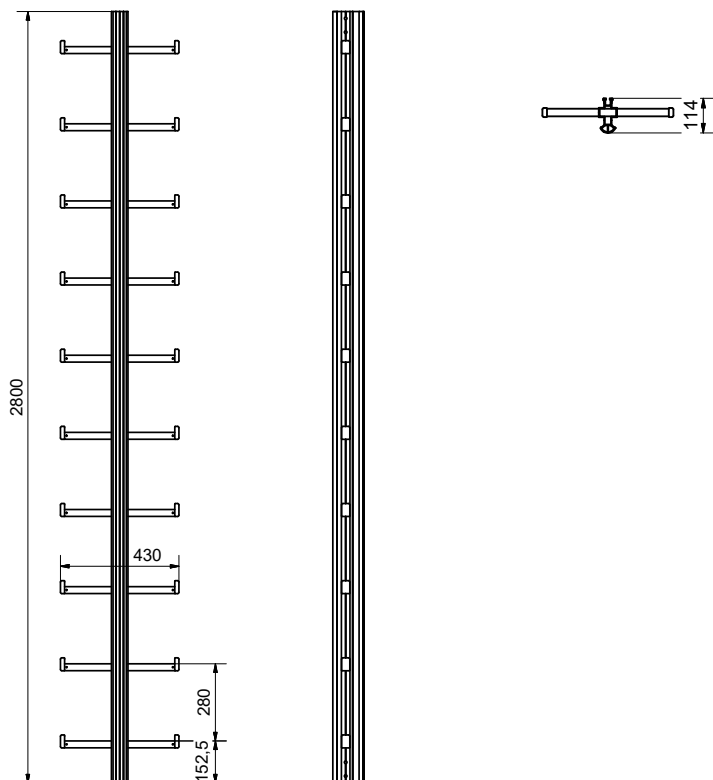

Conforme à EN353-1:2014
MADE IN EU

Advantages

- Easy use
- Trolley equipped with an energy absorber
- Possibility of custom made solutions by the Fallprotec engineering department

Code N°

RHF700
